WORK EXPERIENCE

Wall To Wall Contracting   **Yorktown, NY**
Full Stack Developer   *October 2023 - Present*
- Designing and developing a bespoke business software, significantly enhancing operational efficiency and scalability, enabling the company to continually increase its customer base.
- Utilizing a robust tech stack including Next.js, TypeScript, TailwindCSS, PostgreSQL, AWS S3, Vercel, and Railway to create and deploy scalable solutions.
- Identifies critical bottlenecks in company processes, implementing automation and developing new Standard Operating Procedures (SOPs) to enhance overall efficiency and productivity.
- Development of a new and highly customized company website with enhanced UX/UI and improved navigation, resulting in a more intuitive and user-friendly online experience.
- Implementing SEO strategies to improve the website's online visibility, leading to higher search engine rankings and increasing organic traffic.

BuildASoil   **Montrose, CO**
Full Stack Developer   *May 2022 - June 2023*
- Contributed to the development of a customized Enterprise Resource Planning (ERP) system tailored to the company's specific needs, enhancing production efficiency and automating key business processes.
- Leveraged Next.js, TypeScript, TailwindCSS, Python, AWS, MongoDB, deploying solutions on Vercel.
- Led the development of the "Products" feature in the ERP, converting a large interactive spreadsheet into a user-friendly dashboard with search, filter, and pagination capabilities, significantly boosting productivity.
- Developed RESTful APIs integrated with third-party services to enhance software capabilities.
- Created interactive product components displaying real-time data from MongoDB, Finale Inventory, Shopify, and Amazon.
- Implemented an image upload feature allowing authorized users to manage images with AWS S3, with links stored in MongoDB and integrated into the ERP.
- Utilized the Amazon Selling Partners API for seamless integration between the ERP and the Amazon Store.
- Authored comprehensive and friendly documentation using Confluence and ClickUp.
- Contributed to the development of a React component library using TailwindCSS.

EDUCATION

State University of New York at Oneonta   **Oneonta, NY**
Bachelors of Science, Business Economics   Graduation Date: 2020
